Abstract

We describe the research dataset "Investment Funds Statistics-Base", using a structured metadata scheme.¹ This document consists of three sections. In the first section, we describe the general properties of the dataset as a whole, such as its scope and coverage as well as the methods of data collection and data appraisal. The second section looks at the variable level, providing an overview and detailed tables for each variable. In addition, this section looks at the value level and provides codelists, i.e. information on the meaning of values for categorical variables. The third section provides relevant definitions.

Keywords: Investment Funds, Funds, IFS, IFS-Base, Money Market Funds, MMFs, Financial Markets, Banking Research, Shadow Banking, Behavioral Finance, Financial Stability **Metadata ID** / **Version:** IFS-Base-Data-Doc-v2-0 **Copyright:** Deutsche Bundesbank

¹ The metadata model used is derived from DDI ("Data Documentation Initiative", http://www.ddialliance.org).

1 Dataset Description

1.1 Overview and Identification

Title of Dataset:

Investment Funds Statistics-Base

Abbreviation:

IFS-Base

Dataset Abstract:

The "Investment Funds Statistics-Base" (IFS-Base) is the core module of the Deutsche Bundesbank's Investment Funds Statistics (IFS). The motive behind creating the IFS-Base is to get detailed information about the assets and liabilities of German investment funds (public and specialised funds).

Investment funds data are indispensable for monetary policy analyses as any redistribution of investment funds' assets may affect the financial markets. Financial stability analysis makes use of the data in order to analyse investment funds' exposure to individual counterparties and thus measures interconnectedness in the financial sector. In addition, the data is used to monitor shadow banking activities. Information on the composition and quality of the portfolios of investment funds is used to better understand their investment behavior.

For the IFS, investment companies and public limited investment companies domiciled in Germany, who are within the meaning of the German Capital Investment Code (Kapitalanlagegesetzbuch - KAGB), report general information about their funds (e.g. the fund ISIN or the type of the investment fund) as well as detailed information on the fund's assets and liabilities. The IFS is collected by means of a full census, i.e. every reporting agent has to send a report for each investment fund issued (so-called investor-by-investor approach).

The reporting agents provide information on the asset items of the investment fund broken down by securities (i.e. on a security-by-security basis), bank deposits, loans to property companies, borrowers' note loans, other credit claims, financial derivatives, undeveloped and developed land, participating interests and other assets.

The reporting agents further state the amount of the liabilities listed according to loans taken up, financial derivatives and other liabilities. In addition, for each investment fund information on the number of units sold and outstanding, the issue and repurchase price per unit, income from the sale of fund units, outflows from the repurchase of fund units and earnings distribution are provided.

Data ID / Version: IFS-Base-Data-v2-0

1.2 Dataset Scope and Coverage

Legal basis:

200909 to 201411

- §18 BBkG in combination with:
- Regulation (EC) No. 2533/98 amended by Regulation (EC) No. 951/2009
- Regulation ECB/2007/8
- Guideline ECB/2007/9 amended by ECB/2011/13

201412 to 201712

- §18 BBkG in combination with:
- Regulation (EC) No. 2533/98 amended by Regulation (EC) No. 951/2009 and No. ECB/2014/13
- Regulation ECB/2013/38 (recast)
- Guideline ECB/2014/15 (recast) amended by Guideline ECB/2014/43 and ECB/2016/45

Unit of Analysis:

Investment Funds (each line in the data set corresponds to a reporting of a fund asset)

Time Periods:

200909 to 201712

Geographic Coverage:

Reporting Agents: Germany Fund assets: Worldwide

Universe:

All investment and public limited investment companies within the meaning of the German Capital Investment Code (Kapitalanlagegesetzbuch - KAGB), who are domiciled in Germany, are obliged to report general information (e.g. the fund ISIN, type of investment fund etc.) and the amount of the fund assets as well as a detailed breakdown by value of all asset and liability items.

Investment funds can be distinguished by organisation type (closed-end vs. open-end funds), type of unitholders (funds open to the general public and specialised funds) and investment strategy (equity funds, bond funds, real estate funds, hedge funds, money market funds etc.).

The data collection involves detailed information on the fund's portfolio, i.e. securities (debt securities, shares and investment fund units)², bank deposits, loans, financial derivatives, developed and undeveloped land, other assets and liabilities.

² The term security and the distinctions between the various types of securities are in line with the definitions of the European System of Accounts (ESA) 2010.

Securities are reported on a security-by-security basis meaning that all securities held are reported with their International Securities Identification Number (ISIN) resp. their Internal Securities Number, the amount or number of units held including the price as percentage resp. per unit. As the significance of securities repurchase and securities lending transactions has increased in recent years, securities holdings which are passed on or acquired as part of such contracts are to be flagged separately.

Historical changes:

With its Investment Funds Statistics the Bundesbank has a long history in collecting investment funds data. Initially, only aggregated data on the assets and liabilities of investment funds were collected on a monthly basis.

Since September 2009 this has changed substantially:

- In September 2009 the Bundesbank set up a detailed data collection system based on a security-by-security basis at monthly frequency.
- In December 2014 the reporting items were increased to close down data gaps and to fulfill
 additional data needs of users. For example a separate recording of securities lending and
 the issuing of index funds have been implemented. In order to be able to reflect the business
 processes of all investment funds, reporting positions were added, particularly in the area of
 non-financial assets. Furthermore, the instrument and sector classifications were changed
 from ESA95 to ESA2010-classification.

Special features of the IFS-Base:

For reasons of data protection, the IFS-Base does not contain the same information, which is available in the IFS. There have been three major modifications:

- In contrast to the IFS, the IFS-Base does not contain any identifiers for the reporting agents other than the fund's ISIN.
- Closed-end investment funds, which have to report for the IFS, are not included in the IFS-Base.
- The IFS-Base does not contain any information from the European securities reference database CSDB (Centralised Securities Database).

1.3 Data Collection

Data Collection Mode:

Reporting agents send their reports electronically via the ExtraNet of the Deutsche Bundesbank (format of submitting reports: XMW XML-data format).

Data Collectors:

Deutsche Bundesbank, Statistics Department (S), Securities and Money Market Statistics Division (S 5), Capital Markets Statistics (S 52)

Collection Frequency:

monthly (end-of-month data collection)

Response Rate:

100%

Supervision:

The German competent authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) informs new investment funds about their reporting obligation to the Bundesbank. In addition, the Bundesbank regularly checks the list of investment funds as published by BaFin in order to identify new investment funds.

New reporting agents can look up all reporting requirements in the guidelines on investment funds statistics³. In addition to the guidelines, the reporting agents can use the FAQ to get answers to their questions⁴.

In order to identify non-filers, after the end of the reporting deadline (the fifth workday of the following month), the production system of the Deutsche Bundesbank generates a list of agents, which have not reported until that date. An e-mail is sent to the respective reporting agents with the request to submit the data.

1.4 List of Aggregates

On the Bundesbank homepage you can find some aggregates, which are calculated using the IFS: https://www.bundesbank.de/Navigation/DE/Publikationen/Statistiken/Statistische_Beih efte/statistische_beihefte.html?https=1&https=1. For more detailed figures, please look at the publication "Statistical supplement 2". Some of those aggregates may include:

- · Funds total assets
- Funds credit assets
- · Funds credit assets of which lending
- Funds long term assets
- · Funds liquid assets
- Funds assets under management (AUM)

1.5 Data Appraisal

Quality Checks:

DISCLAIMER: The following quality checks are carried out for the Deutsche Bundesbank's Investment Funds Statistics (IFS). They also apply to the IFS-Base.

Standardised quality checks look for any irregularities or implausibilities in the data structure. If necessary, the reporting institutions are asked to double-check or clarify specific data points.

In order to identify erroneous data fields, there is an automatic formal check on the submitted data of the reporting agents. If the check shows any formal error, the production system does not accept the submitted data. For every reporting agent, the system generates a document which contains the errors in the submitted data file. The reporting agent receives the document via email. In case of errors, the reported data has to be submitted again.

Formality checks:

- The sum of the sub-positions has to equal the position.
- The net asset value, the in- and outflows etc. have to be filled.
- The country and currency codes have to be part of the ISO-standard.

Consistency checks:

- The data dimension of positions and sub-positions has to be the same.
- Comparison of the reported values with the transmitted data of the previous month.

A variety of other plausibility checks are performed for each reported investment fund. These checks show any formal errors for every reporting agent. An e-mail which contains these errors is sent to the affected reporting agent with the request to correct the data within three days.

Data Editing:

DISCLAIMER: The following data editing steps are carried out for the Deutsche Bundesbank's Investment Funds Statistics (IFS). They apply to the IFS-Base in parts.

- 1. Data transmission by reporting agents: reporting deadline is the 5th working day of the month following the reference month.
- 2. 1st level of checks: standardised plausibility and completeness checks (see "Quality Checks") and feedback to reporting agents
- 3. 2nd level of checks: consistency checks (see "Quality Checks")
- 4. Combination of IFS data with the securities data from the Centralised Securities Database (CSDB); only for securities with an ISIN and only for IFS data
- 5. Production of time series / building blocks
- 6. Release of data, publication

1.6 Data Accessibility

Research Proposal Conditions:

A research proposal is checked for feasibility of the research project given the research data, i.e. the suitability of the data to answer the research questions raised by the proposal. The research project must be of public interest, i.e. without commercial goals.

Institutional Access Conditions:

The researcher must be affiliated with a research institution that clearly has a scientific, noncommercial agenda.

Contact:

Deutsche Bundesbank E-Mail: fdsz-data@bundesbank.de Homepage: www.bundesbank.de/Navigation/EN/Bundesbank/Research/RDSC/rdsc.html

Deposit Requirements:

The researcher must sign a confidentiality agreement. The data provider must be informed about any documents that are made available to the public that contain information derived from the provided data. The researcher is obliged to provide proof of proper data source citation through providing copies of the manuscripts and / or publications.

Citation Requirements:

For any study or other document which is made available to the public and contains information derived from the provided data, the researcher is obliged to properly cite the data source as follows:

Dötsch, P., Flory, J. and T. Schönberg (2018). Investment Funds Statistics-Base 09/2009 - 12/2017, Data Report 2018-03 – Metadata Version 1-1. Deutsche Bundesbank Research Data and Service Centre.

In addition to that, the DOI for the IFS-Base data under use has to be cited: **10.12757/Bbk.IFSBase.09091712**

2 Variable Description

2.1 Variable Overview

Name	Label
DATE :	Data is reported for last day of this month
ISIN :	International Securities Identification Number of the fund
APPLAW :	Applicable legislation for the reporting fund
FCAT :	Type of investment fund by investment focus
FFCAT :	Type of fund of funds by investment focus
ORGFORM :	Organisational form of the investment fund b legal form
INVTYPE :	Type of investment fund by investor group
UCITSAIF :	Shows whether the fund is UCITS or AIF
CAPPROT :	Shows whether the fund is a capital protection fund or not
DISGROW :	Type of fund according to income use
FMAT :	Type of fund by maturity
REPOCAT :	Type of fund unit repurchases
REPOSUS :	Shows whether the fund's unit repurchase are suspended or not
SUSDATE :	Suspension date
QUOT :	The investment fund's quotation type
INDXF :	Shows whether a fund is an index fund or no
ETFF :	Shows whether a fund is an exchange trade fund (ETF) or not
INDREP :	Type of index replication
INDISIN :	ISIN of the replicated index
INDNAME :	Name of the replicated index
HIERARCHY :	Superordinated fund (hierarchy levels)
SUPF :	ISIN of the superordinated fund
DISF :	Shows whether the fund is dissolved or not
SUBPOS :	Sub-positions of the fund's total assets and a other positions of the reporting forms
AMOUNT :	Amount which corresponds to SUBPOS
ESA1995 :	Issuer sector of SUBPOS
ESA2010 :	Issuer sector of SUBPOS
	Variable overview is continued on next page

Name	Label
CNTRY :	Country of the reported SUBPOS
CNTRYGRP :	Country group of of the reported SUBPOS
CURRENCY :	Currency code of the reported SUBPOS ac cording to ISO 4217 code list
CURGRP :	Shows whether the currency is Euro, part on the EU or does not belong to the EU
SECCODE :	Security code of the security held by the fun (ISIN or internal security code)
SECISINDUM :	Shows whether a security has an ISIN or not
SECQUOT :	Shows the quotation type of the security
SECNOMUN :	Sub-position to SECQUOT
SECPRICE :	Sub-position to SECQUOT
SECREPO :	Repurchase transactions
SECLEN :	Securities lending transactions
SECTERM :	Term of security (original term)
SECTERMBGN :	Date term start
SECTERMEND :	Date term end
SECMAT :	Maturity of the security
TERM :	Term for everything which is not a security (e. credits, holdings)
MINRES :	Shows if an institution is subject to a minimure reserve requirement (must only be complete for money market funds)
AFFILCOMP :	Shows whether an institution has an affiliate company or not
NUMOBJ :	Shows how many non-financial assets th fund owns in a particular country
USETYPE :	Filled only for developed land

2.2 Variable Details

DATE : Data is reported for last da	ay of this month	
Detailed description and notes:	Date in the format "YYYYMM"	
Period of availability:	200909 to 201712	
Source:	IFS-Base	
Variable type:	numeric	

Variable overview is continued from previous page

ISIN : International Securities Identification Number of the fund

Detailed description and notes:	The ISIN code is a 12-character alpha-numerical code which uniquely identifies a security. In case of the IFS- Base, the ISIN variable shows the ISIN of the reporting fund. The structure of the ISIN is defined in ISO 6166. By using the ISIN, information about the respective fund can be linked to the IFS-Base (e.g. information on prices, dividends, stock splits etc.).
Period of availability:	200909 to 201712
Source:	IFS-Base
Variable type:	fixed string

APPLAW : Applicable legislation for the reporting fund

Detailed description and notes:	In the standard case, the APPLAW for the reporting fund is "DE", i.e. the applicable law regime relevant for the report- ing fund is the German legislation. In case APPLAW is not "DE", the codelist of the variable CNTRY applies. Country codes are provided according to the two-digit ISO 3166-2 country code.
Period of availability:	200909 until 201712
Source:	IFS-Base
Variable type:	fixed string

FCAT : Type of investment fund by investment f	ocus
--	------

Period of availability:	200909 until 201712
Source:	IFS-Base
Variable type:	numeric
Code	Meaning
1	Equity-based fund
2	Bond-based fund
3	Mixed securities-based fund
4	Real estate fund
6	Money market fund
7	Fund of funds
9	Pension mutual fund
10	Hedge fund
12	Derivatives fund

Detailed description and notes:	For the economic sector, the four-digit internal codes are used. The classification of the sector is in accordance with the European System of Accounts (ESA). For the purpose of the IFS-Base a more detailed breakdown in some sec- tors is necessary. CAUTION: Until November 2014 the classification of the sector of the holder followed the ESA 95 scheme. Since December 2014 this classification fol- lows the ESA 2010 scheme.

3 Definitions

UCITS

A UCITS fund is an investment fund under the Undertakings for Collective Investment in Transferable Securities Directive 2009/65/EC. This consolidated EU Directive allows collective investment schemes to operate freely throughout the EU on the basis of a single authorisation from one member state. One focus of the Directive is on the regulation of the permitted assets into which a UCITS may invest (eligible assets). EU member states are entitled to have additional regulatory requirements for the benefit of investors.

AIF

Under the AIFM-Directive (Directive 2011/61/EU), an alternative investment fund or "AIF" is any collective investment undertaking, including investment compartments thereof, which raises capital from a number of investors with a view to investing it in accordance with a defined investment policy for the benefit of those investors and which does not require authorisation pursuant to the UCITS Directive.
